Google Class C

- Google keeps your searches and other identifiable user information for an undefined period of time
- Google can use your content for all their existing and future services
- This service tracks you on other websites
- Google can share your personal information with other parties
- Google may stop providing services to you at any time

More details

YouTube Class D

- Terms may be changed any time at their discretion, without notice to the user
- They can remove your content at any tim and without prior notice
- The copyright license is broader than necessary
- Reduction of legal period for cause of action
- Deleted videos are not really deleted

More details

SoundCloud Class B

- You stay in control of your copyright
- Collected personal data used for limited purposes
- 6 weeks to review changes
- Indemnification from claims related to your content or your account
- Personal information can be disclosed in case of business transfer or insolvency

More details

GitHub Class B

- You don't grant any copyright license to github
- Changes can happen any time, sometime without notice
- You shall defend and indemnify GitHub
- Your personal information is used for limited purposes
- Your account can be suspended and your data deleted any time for any reason

More details

Twitpic Class E

- Twitpic takes credit for your content
- Your content is for Twitpic and their partners
- Reduction of legal period for cause of action
- You indemnify Twitpic from any claim

Delicious Class D

- Very broad copyright license on your content, includes right for Delicious to distribute through any media
- No Right to leave the service
- Only for personal and non-commercial us
- [bad] delicious new terms 5. third party

Pêter les plombs

néo-luddisme

Theodore Kaczynski

Cette interview du C.L.O.D.O. est parue dans la revue «Terminal 19/84» d'octobre 1983. Donner la parole au C.L.O.D.O. ne peut qu'enrichir le débat qu'essaie de susciter cette brochure. Evidemment ! nous laissons aux «clodos» l'entière responsabilité de leur texte.

Le CLODO, ou les clodos, c'est donc vous ?

S'il vous faut une preuve, nous la fournissons : lors de notre dernière action notoire, contre le centre informatique de la préfecture de Haute-Garonne, nous avions envoyé un communiqué à plusieurs journaux dont le *Canard Enchaîné* et le magazine *Résistances* d'*Antenne 2*, qui n'en ont pas soufflé mot. Mais, au-délà de cette confirmation de notre "identité", nous profitons de ce préambule pour préciser quelques évidences : nous sommes des individus, travailleurs de l'informatique ou non, qui nous rejoingnons dans une lutte.-

Nous ne constituons, ni une organisation, formelle ou informelle, ni un phalanstère. Et le "nous" qui sera employé dans les réponses à votre interview ne devrait pas être la forêt qui cache les arbres ! Nombreux et décisifs sont nos points d'accord mais aussi nombreuses, (bien que moins décisives) sont nos divergences.

En finir avec les mythes

Pourquoi acceptez-vous cette interview ?

Il nous a toujours semblé que les actes parlaient d'eux-mêmes et il a fallu qu'un membre (prétendu ?) d'une organisation soi-disant armée et en tout cas éphémère tente de faire passer nos actes pour ce qu'ils n'étaient pas, pour que nous décidions d'écrire un communiqué.

Pourtant, face à la propagande du pouvoir, particulièrement stupéfiante en matière d'informatique, et pour en finir

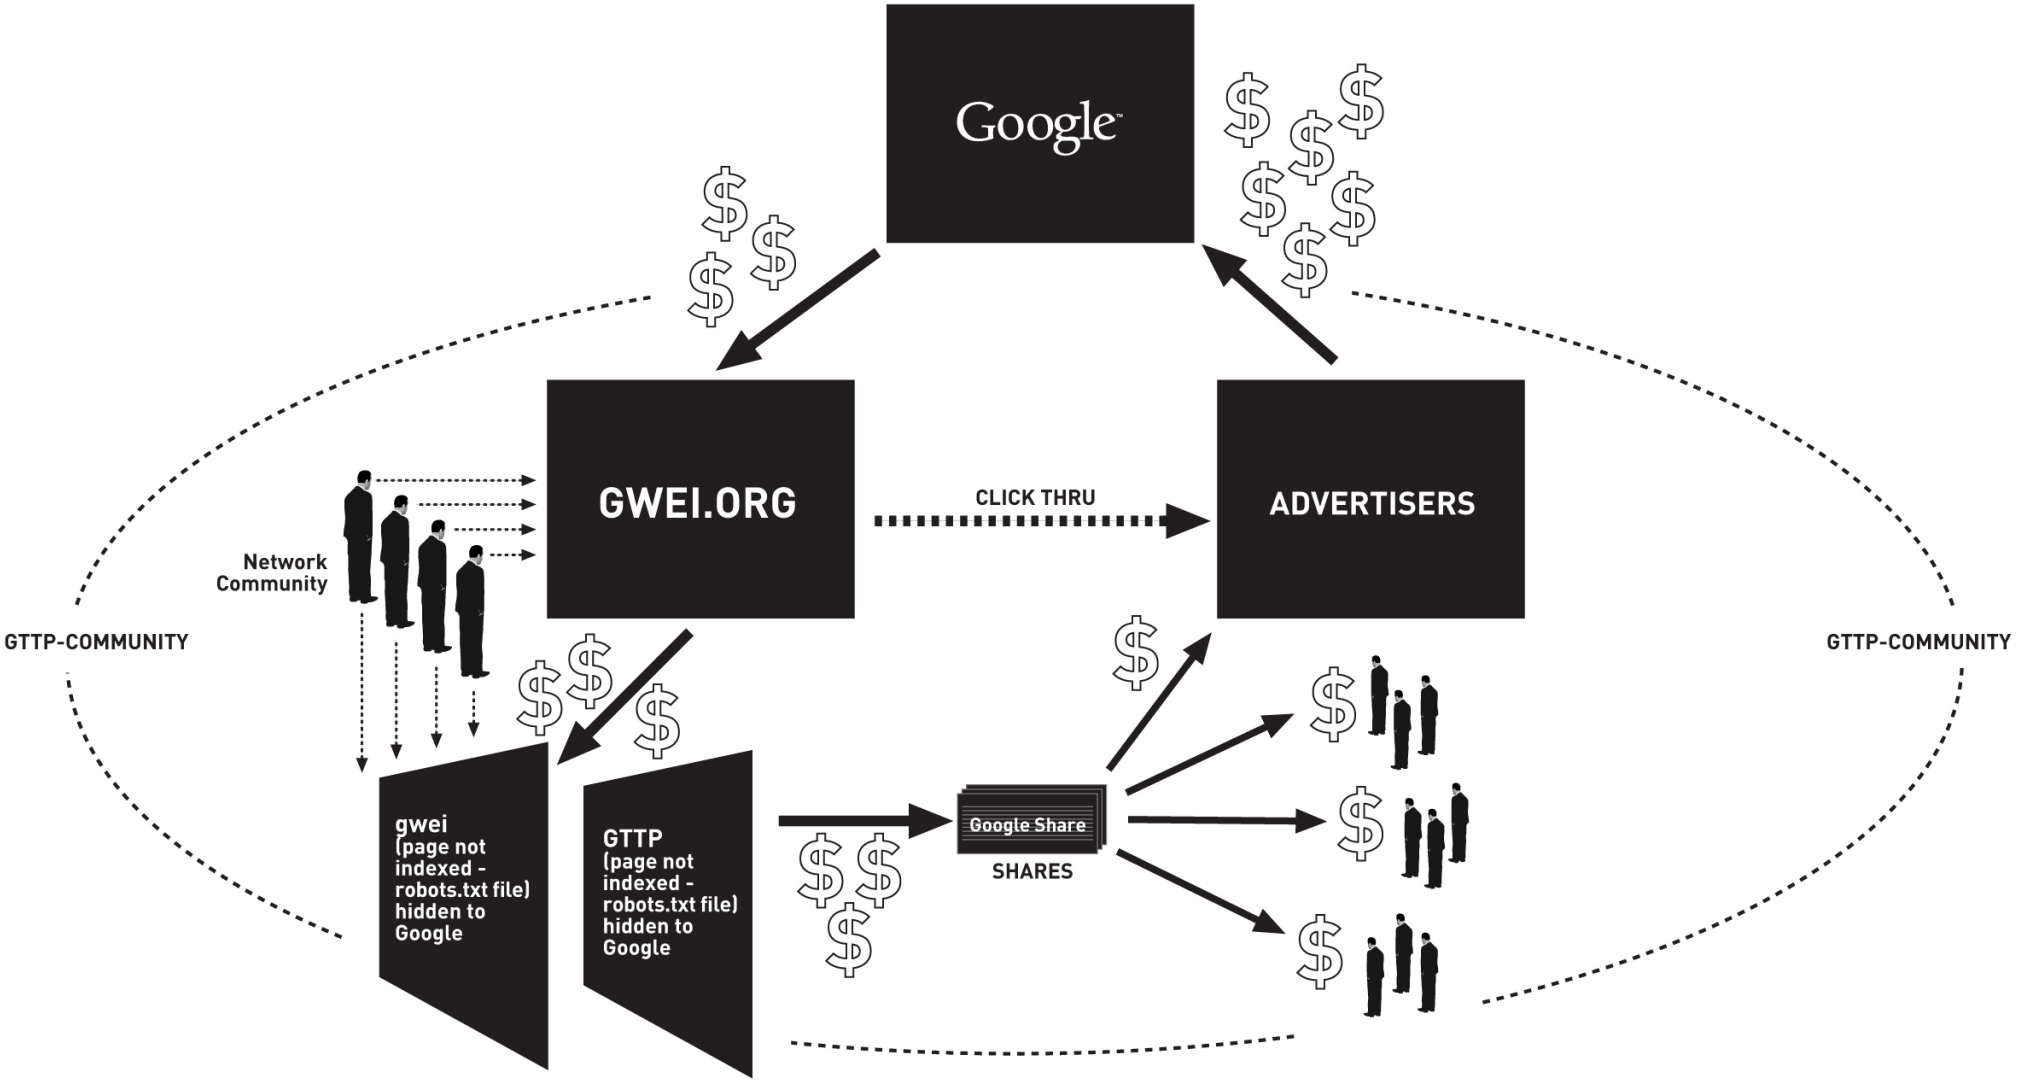
Créer une boucle cybernétique récursive

Google Will Eat Itself - GWEI
Google To The People - GTTP



The "gwei"website is created as a invisible 'clone' site to GWEI .org. Gwei is the site which explains the share-buying and the concept of redistirbution of shares to the community.

"GTTP" (Google To The People) is the community site which distributes shares to the users and back to the advertisers. GTTP runs infrequent online demonstrations on the Google.com Website.

And so... We inject a social virus (let's share their shares) into their commercial body hidden under Googles polite and friendly graphic surface

GWEI

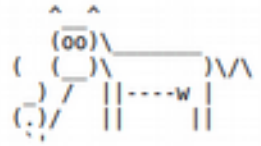
A DIY guide to rob banks



By Subcowmandante Marcos

I am a wild child
Innocent, free, wild
I am all ages
My grandparents live on in me

I am a brother of the clouds
And I only know how to share
I know that everything belongs to everyone,
That everything is alive in me

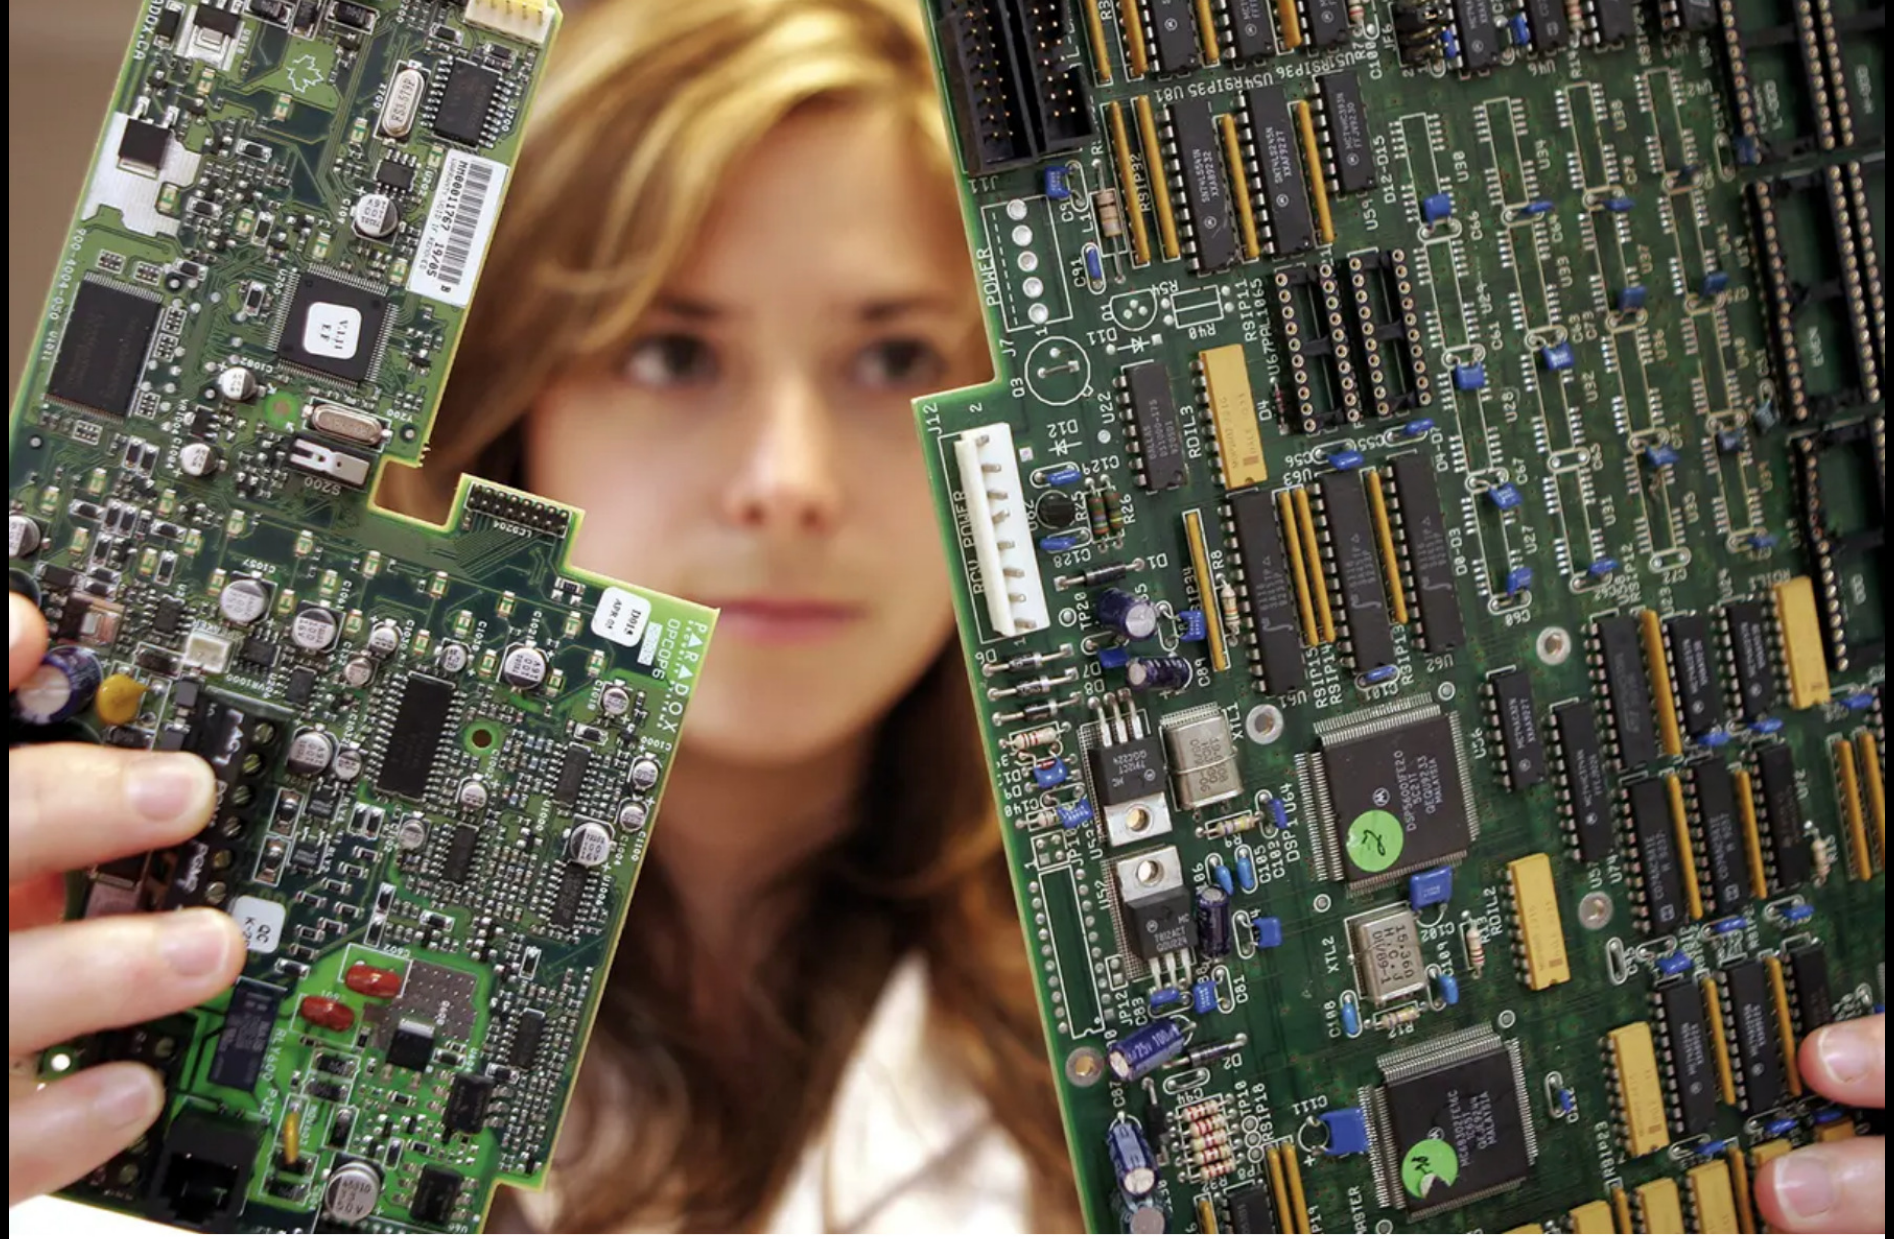
My heart is a star
I am a son of the earth
Traveling aboard my spirit
I walk to eternity

These are my simple words that seek to touch the hearts of people who are simple and humble, but also dignified and rebellious. These are my simple words to tell about my hacks, and to invite other people to hack with cheerful rebellion.

I hacked a bank. I did it to give an injection of liquidity, but this time from below and to the simple and humble people who resist and rebel against injustices throughout the world. In other words: I robbed a bank and gave away the money. But it wasn't me alone who did it. The free software movement, the offensive powershell community, the metasploit project and the hacker community in general are what made this hack possible. The exploit.in community made it possible to convert intrusion into a bank's computers into cash and bitcoin. The Tor, Qubes and Whonix projects, together with the cryptographers and activists who defend privacy and anonymity, are my nahuales, that is, my protectors [1]. They accompany me every night and make it possible for me to remain free.

I did nothing complicated. I only saw the injustice in this world, felt love for all beings, and expressed that love in the best way I could, through the tools I know how to use. Hate does not move me to banks, or to the rich, but a love for life, and the desire for a world where everyone can realize their potential and live a full life. I would like to explain a little how I see the world, so that you can get an idea of how I came to feel and act like this. And I also hope that this guide is a recipe that you can follow, combining the same ingredients to bake the same cake. Who knows, out there these powerful tools could end up also serving you to express the love you feel.

We are all innocent, free, wild wild children
We are all brothers of the trees children of the earth
We just have to put in our hearts a burning star
(song by Alberto Kuselman and Chamalú)



APPEL À NOS COLLÈGUES INFORMATICIENS ET INFORMATICIENNES

« Nous vous demandons d'agir, de vous manifester, et de contribuer au blocage de l'appareil productif et des institutions. »
